

PAN DAKOTA DIVE SERVICES

The Engineer's Choice.

Potable Water Servicing - Water That is Safe to Drink is a Necessity

Operations and preventative maintenance tasks are vital in maintaining your public water supply systems. Often times the underwater maintenance of potable water reservoirs is overlooked.

There is a wide range of services we can provide beginning with ROV video inspections to cleaning to valve maintenance and replacement to help in finding the source of blockages or contamination and assist you with eliminating them.

How We Can Help:

- Video/ROV Inspections
- Maintenance/Repairs
- Cleaning
- General Commercial Diving Needs
- JetBoat
- Ice & Swiftwater Rescue
- Underwater Digital Ultrasonic Thickness Gauge Testing

Pan Dakota Dive Services can detect age deterioration, environmental sources of a problem, and control defective areas by performing preventive maintenance on treatment plant and pump house operation facilities relating to water supply.

We will help you deal with deterioration from aging storage tanks and environmental sources as well as provide urgent trouble-shooting action to recover the facility before large-scale damage occurs.

Pan Dakota Dive Services is a proud member of ISNetwork and the Canadian Association of Dive Contractors.
